Introduction

AXEPTA BNP Paribas allows you to accept payments using different payment methods. Each of them offers different possibilities, through an e-commerce platform, such as:

- One-off payment
- One-click payment
- Recurring payment.

Prerequisites

Compatibility with PHP versions :

The plugin supports versions from **2.3.X** to **2.4.6 P4**

NB: please note that the plugin is not compatible with Magento Cloud.

Installation of the plugin

To install the plugin, you need to follow the following steps: Download the zip file and extract it.

- Go to the root file of your website.
- Create the following new folders:

```
app/code/Bnp-paribas
app/code/Bnp-paribas/Axepta
```

- Copy all the content of the extracted file in the folder: "app/code/Bnp-paribas/Axepta".
- Go back to the root file of your website and launch the following commands:

```
php bin/magento setup:upgrade
php bin/magento cache:clean
php bin/magento cache:flush
```

Global configuration of the plugin

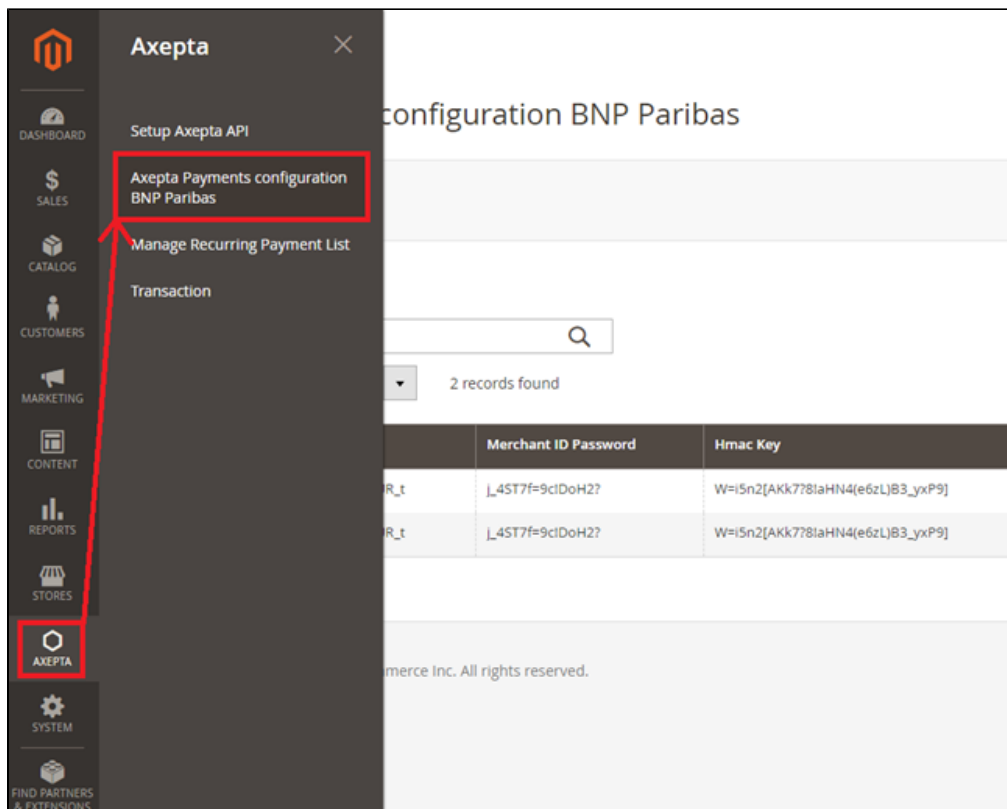

The different functionalities of the plugin are displayed on the left side of the backoffice. To start the configuration of the module, you need to click on "AXEPTA".

The screenshot shows the Magento 2 backoffice interface. On the left sidebar, the 'AXEPTA' menu item is highlighted with a red box. A dropdown menu is open for 'AXEPTA', showing the following options: 'Setup Axepta API', 'Axepta Payments configuration BNP Paribas', 'Manage Recurring Payment List', and 'Transaction'. The 'Axepta Payments configuration BNP Paribas' option is also highlighted with a red box. The main content area shows a dashboard with a revenue chart (displaying €0.00) and a table of bestsellers.

To create the configuration of a new account, click on the link "Axepta Payments configuration BNP Paribas" :

Configuration paiements Axepta

Then, click on the button "Add new Merchant Account" to add information about the new merchant.

You also need to import the XML file (that you will find in the .zip file downloaded) by clicking on the "import XML" button.

Fulfill the following fields of the form with the information provided by mail:

- 1 - Front office label : this represents the field you want to customize for your customers to pay. Example : "Pay with AXEPTA BNP Paribas"
- 2 - MID (Merchant ID) : Sent by BNP Paribas assistance.
- 3 - Password : Sent by BNP Paribas assistance.
- 4 - Hmac key : Sent by BNP Paribas assistance.
- 5 - Activation key : Sent by BNP Paribas assistance after the receiving the merchant's plugin invoice.
- 6 - Authorized countries
- 7 - Enable / disable account
- 8 - Default shop

Alipay

Yes

Some payment methods can be disabled when the countries where they are authorized are not enabled in the backoffice. To enable one or many countries, you should click on the tab "Stores" > "Configuration" > "General" and enable the needed countries by selecting them.

You will have to use the "Axepta" button to go back to the payment methods configurations.

You can now configure other account options:

Currency :

The currency is provided by the activation key. This data can't be modified. It appears only as an information for the account management.

You should enable the currency in advance in the backoffice. To do so, you need to go to the menu "Stores" > "Configuration" > "Currency Setup" and enable the preferred currencies by selecting them.

Display mode :

Displaying the payment page can be done in two ways :

- Redirection => External redirection of the user towards the payment page.
- IFrame => Displaying the payment page on an iFrame.

3DSecure and exemption management :

The 3DSecure is still activated on your store, you can nevertheless activate the "Exemption request" option which will allow you to request an authentication exemption for the cardholder during a simple payment on your merchant site.

To enable exemption requests, please select "Yes" in the "Exemption request" box to disable please select "No"

3D Secure exemption request * Yes

Yes => The use of 3D Secure authentication protects the merchant against the cardholder dispute reason for non-payment. In case of request of exemption of authentication by the merchant, the latter loses this transfer of responsibility in the majority of the cases. (for more details: Transfer of responsibility and 3D-Secure Matrices - Documentation Axepta BNP Paribas - Axepta)

Amount
Maximum amount for exemption requests

Attention : Please note that the use of 3D Secure authentication protects the merchant against the reason for unpaid invoices "holder dispute". In the event of a request for exemption from authentication by the merchant, the latter loses this transfer of responsibility in the majority of cases (For more details: [Liability shift and 3DS Matrix - Documentation Axepta BNP Paribas - Axepta](#)). This is a request for exemption, this does not mean that it will be granted systematically by the issuer of the cardholder's card. Exemption requests only work with transactions paid in Euro.

Known error: Since switching to 3DSV2, it is imperative to send the parameter "BillingAddress" to Axepta to make a payment.

This parameter contains the following data:

- City
- Country
- Billing Address 1
- Postal Code

These fields are mandatory for the module to function properly and must be present in the payment form:

Ce formulaire est incomplet, Depuis le passage vers le 3DSV2, certains champs sont devenus obligatoires: Il s'agit

Cas d'une erreur recurrente: Parametre BillingAddress Invalid

Avec ce type d'erreur, il faut bien vérifier dans la boutique du client si le formulaire contient toutes informations

Ces données sont obligatoires pour faire un paiement en 3DSV2

One click payment:

This option enables one click payment by saving the payment methods data in the user's account.

Subscription :

This option enables the subscription payment.

Capture methods

This option allows you to choose the capture mode you prefer :

- Automatic => Capture at the end of the day
- deferred => After a defined time. If you choose this option you can also define the time limit before the capture (time limit in hours : number between 1 and 696)
- Manual capture : Follow the detailed explanations below

Enabling Manual Capture

From the merchant configuration menu, scroll down to the "Capture" field and select "Manual Capture".

Oneclick payment active * Yes

Enable the one-click payment in the front office.

Recurring payment active * Yes

Enable the recurring payment in the front office

Capture Mode

Manual capture

Automatic capture payment (by default)

Capture after time defined

Manual capture

transaction beyond the 7th day results in the loss of collateral associated with
thorization granted by the issuer will no longer be valid. It is therefore

Attention : Without action of the merchant, the transaction will not be returned to the bank. Capturing a transaction beyond the 7th day results in loss of collateral associated with 3D Secure. After the 29th day the authorization granted by the issuer will no longer be valid. It is therefore preferable to capture operations before these deadlines.

Changing the display of the control orders :

Two columns have been added in the command table: one to know what type of capture was used for the command (automatic, manual or deferred), and another to know if the payment was captured from the Magento back office. A capture made on the Acepta back-office does not result in the update of this command panel but an alert is proposed in the event of an attempt on a transaction already captured (see alert notification).

Create New Order						
<input type="text"/> <input type="button" value="50"/> <input type="button" value="←"/> <input type="button" value="→"/>						
id	Status	Action	Allocated sources	Capture Type Acepta	Capture by Acepta * from magento	Braintree Transaction Source
	Processing	View		Capture : manual	Yes	
	Processing	View		Capture : timed : 2023-05-10 10:57:22	Yes	
	Processing	View		Capture : manual	Yes	
	Processing	View		Capture : auto	Yes	
	Processing	View		Capture : manual	Yes	
	Processing	View		Capture : manual	Yes	

Deferred captures are marked "Capture: timed" followed by the date and time the capture was made.

To capture manually your transaction :

To capture a payment manually, the order must be billed. Go to the page of an order to be billed and click on "Invoice".

#000000094

Capture Online
Capture Online
Capture Offline
Not Capture

Submit Invoice

Capture online : The online capture from the Magento 2 back office will connect to the axepta back office. The status of the transaction is automatically synchronized between the two back offices.

Offline capture : Offline capture will simply generate the invoice and mark the order being processed, which means that the amount has been received manually.

Not capture : It is there for information purposes to indicate that there was no capture on the order. This can be used in the case of non "capturable" orders for free orders or paid by check.

Partial Capture :

You can capture only part of the order if it has multiple items by changing the quantities in the column. In this case, delivery charges will always be captured on the first invoice. For the next payment catches of this same order, delivery costs will not be counted.

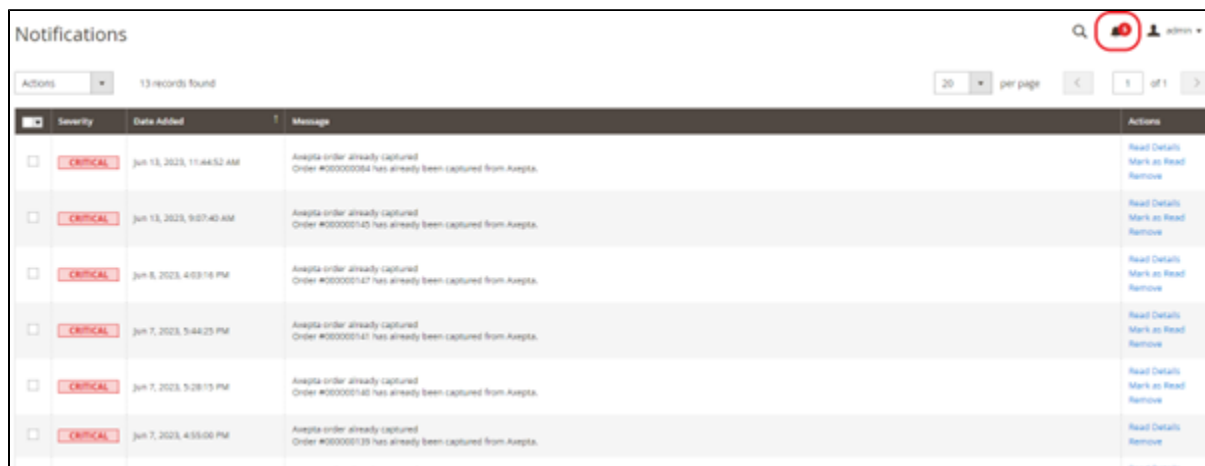

Alert Messages :

If attempting to bill an order where payment has already been captured, an alert message "Order has already been captured" will appear at the top of the page as follows :

Notifications have also been added when the capture has already been completed, as well as when a payment has not been captured for more than 7 days. The update is done once a day.

These notifications are visible by clicking on the icon at the top right of the screen :

Logs :

This option enables logs in order to share data with the support in case of issues.

Your account is now configured.

You can configure as many accounts as your contract allows you to.

To add another account, you need to go to "Axepta payment configuration" and do the exact same manipulations.

The list of accounts will be updated after every new entry.

Subscription

Enable/disable subscriptions

Go to "Axepta" > "Axepta Payments configuration BNP Paribas" > Select your MID and click on "Edit" in the "Action" column. > "check the « Recurring payment active » button

Configuration

When the « Subscription » option is enabled, it's possible to configure items which will be paid by subscription.

To do so, you will need to configure every item that accepts subscriptions: Go to « Catalogue » > « Products » > Search by name of the item that you would like to configure as subscription by clicking on its name.

To pay for a subscription product, it is mandatory to have a customer account. For guest mode customers who have a subscription product in their cart, the creation of a customer account is requested before making the payment.

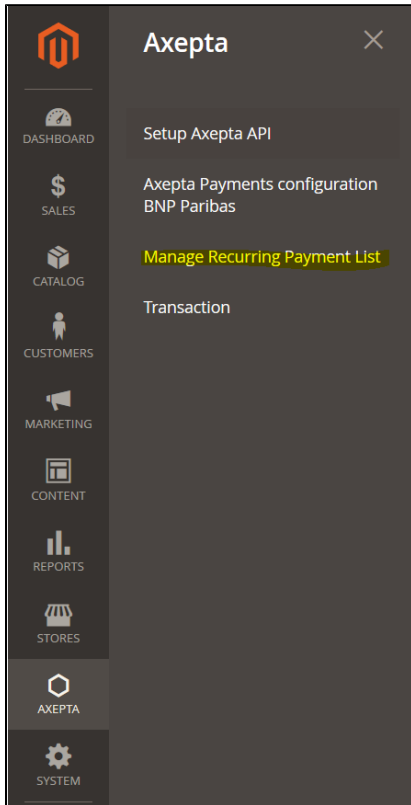

On the product sheet, you need to go to "Axepta recurring data options" and fulfill the different fields :

You can now configure the item :

- Type : indicates if the item will be paid by subscription or standard payment.
- Periodicity : indicated the type of subscription (monthly or daily)
- Interval occurrence : Number of times that the payment will be proceeded. If this value is not filled, the occurrence is unlimited.
- Recurring amount : Indicated the amount of the item in subscription, so this value can be different from the initial price of the item. This value represents the value that will be withdrawn in the future transactions.

Subscriptions management

You can preview all the subscriptions in the tab "Axepta" > "Manage Recurring Payment List »

You will find the following data for every transaction:

- Subscription ID
- Order ID
- Client ID du client
- Product ID
- Associated transaction ID
- Subscription status
- Periodicity
- Date of the last payment proceeded
- Date of the next payment
- Subscription amount
- Action column

Refund Offline **Refund**

For a full refund, you can only keep the values by default and validate. For a partial refund, you can adjust the amounts.

The "Ajustement Fee" field allows you to set a specific amount you would like to refund.

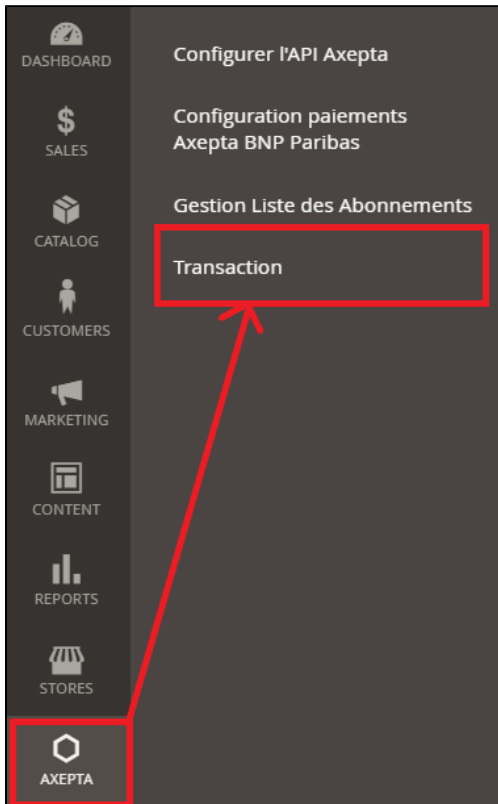

For example : Subtotal = 45, Ajustement Fee = 15, when you click on "Update Totals" you will get 30 as refund for the customer.

If the order was placed via a one-off payment, a refund will be issued directly to the buyer.

For orders via subscriptions, no refunds are possible.

When it comes to a refund of the total amount of an order, the choice of a refund or a cancellation will be made automatically according to the banking status of the current order. Cancellation will be preferred if possible.

To find out if the order has been cancelled or fully refunded, go to "Axepta" > "Transaction" to see the list of transactions, as below :

The "Type" column will show if the transaction was paid, cancelled or refunded.

ID	1	Amount	Type	MerchendiD	Date	Order ID	Reference	Code	Status	Description	Action
28		-39.0000	refund		2020-04-23 08:36:52	000000047	47	00000000	OK	success	View
27		39.0000	PAIEMENT		2020-04-23 08:41:44	000000047	47	00000000	OK	success	View
26		-39.0000	cancellation		2020-04-23 08:40:19	000000046	46	00000000	OK	success	View
