Introduction

Welcome to the documentation for the **AXEPTA BNP Paribas** module for Prestashop.

This free module allows you to easily integrate our online payment solution into your e-commerce store.

This documentation guides you step by step through the installation, configuration, and use of the module to ensure a simple, reliable, and tailored integration to your needs.

This module is freely available at the following address: <https://github.com/AxeptaBNPParibas>

Our goal is to support you so that the implementation of our AXEPTA BNP Paribas solution is quick, intuitive, and fully functional in your Prestashop environment.

Plugin Setup

The module installation process is as follows:

- Download the module zip file and then unzip it
- Go to the "Modules" tab in your store's backoffice (on the left side of the screen) > "Module Catalog", click on "Install a module" and then upload the module zip file (by dragging it to the appropriate area)

- In the "Module Manager" tab of the same menu, search for "Axepta" and locate the Axepta BNP Paribas plugin

- Click the "Configure" button to begin the setup.

This configuration page allows you to set up the store's generic parameters, especially if it is a "multi-store".

In a multi-store setup, make sure to select the specific store you need to configure.

Update Plugin

1. Download the new zip archive
2. Put your store in maintenance mode
3. Go to the "Modules" tab in your store's backoffice (left side of the screen) > "Module Catalog", click on "Install a module" and then upload the zip file as you would for a new installation
4. Remember to activate the module which may have been deactivated

Notice : The library is automatically updated with the Prestashop module update

Back Office

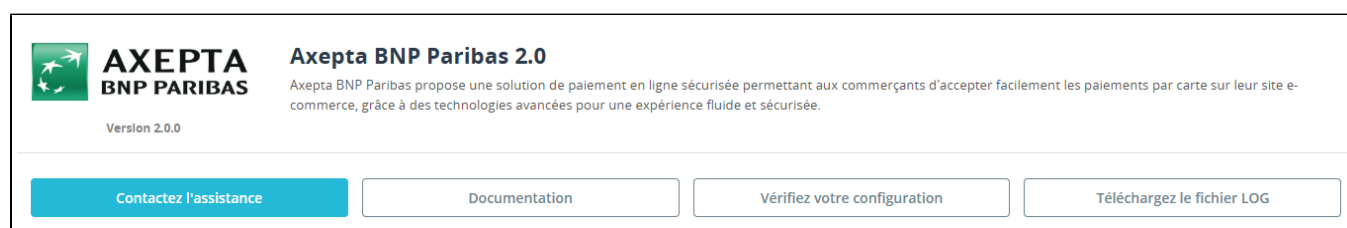

After updating, remember to reconfigure the Axepta Online settings in each module tab. You will need to re-enter your MID and activation key to put your module back into production.

Plugin Global Settings

The various tool's features are available in the left-hand menu of the page. To begin configuring the module, click on "AXEPTA".

The configuration page displays several buttons at the top:

- **Contact Support:** Opens a form to send an email to support. The server, CMS, and module versions are automatically included in the email.
- **Documentation:** When clicked, the user is redirected to the official documentation hosted by BNP Paribas.
- **Check Configuration:** Allows displaying and verifying in a window that the server configuration is compatible with the installed module.
- **Download LOG File:** Allows downloading the log file related to the module's usage.

Account Settings

o activate online payments, you need to configure both the production mode and the test mode:

Demo Mode ("DEMO") Allows you to test the module without setting up a MID (Merchant ID, provided by BNP Paribas during registration)

Production Mode Requires you to enter the MID and the private key

Test Mode Requires you to enter only the private key. The production MID is used with the parameter (t) added to it

Select the mode you wish to configure to display the appropriate fields

To use the module, you need to fill in the following parameters in the form:

1. **Production Mode:**

- MID (provided by BNP Paribas)
- Private Key (provided by BNP Paribas)
 - This is never displayed for security reasons

2. **Test Mode:** The production MID is used by default with the addition of a character string

- Private Key (provided by BNP Paribas)
 - This is never displayed for security reasons

3. **Demo Mode** This mode displays a banner on the site to inform that this mode is active A specific MID is pre-configured

4. **Front-end Activation** Required to display the module on the checkout page regardless of the activated mode

Payment Method Configuration

You can now select the different payment methods to activate on your store.

A "Payment Configuration" block allows you to configure the display of payment methods on the checkout page as follows:

Configuration du paiement

* Organisation des moyens de paiement

Choix du moyen de paiement sur le site marchand

* Méthode d'affichage

Redirection

* Mode capture

Automatique

Enregistrer

All payment methods integrated into the library are presented here. It is up to the merchant to select the payment methods they have subscribed to. The activation key no longer allows defining the payment methods.

Payment Organization:

This refers to the display of payments that has been decided on the checkout page.

- **Grouped:** Payment blocks appear. It is possible to configure payments for redirection and iframe.
- **HPP (Hosted Payment Page):** Only redirection is possible with all payment methods grouped into a single button. A complete block is displayed, with no differentiation between cards and other payment methods.

Display Method:

- **Redirection:** During the payment phase, the user is redirected to a page based on the selected payment method.
- **Iframe:** During the payment phase, the form is displayed at the bottom of the checkout page based on the selected payment method.

Capture Method

This option allows you to choose the payment capture method:

- Automatic (J) => The capture will be automatically processed at midnight.
- Deferred (J+x) => You can choose the delay before the capture (delay in hours: integer between 1 and 696. Example for 2 days: enter 48)
- Manual Capture => Manual capture is performed manually by the merchant through a configuration in the back-office.

Activation of Automatic Capture

When automatic capture is selected, payment flows are automatically captured at midnight.

Activation of Deferred Capture:

Deferred capture is configured with a specified number of hours before the capture is executed. The maximum allowed delay is 696 hours (29 days).

Notice : No action is required by the merchant to perform the capture. It is confirmed by a return flow (IPN).

Activation of Manual Capture:

In the merchant configuration menu, scroll down to the "Capture" field and select "Manual Capture."

The Subscription and AMEX Subscription payment methods are available when the cart contains a product associated with a subscription, and are then displayed on the checkout page

Customization

Allows configuration of the fields sent in the payment form during redirection.

Personnalisation

- Libellé de paiement: Payer avec Axepta
- Afficher le logo sur la page de paiement: ☒ Oui
- URL du logo:
Recommande 200x100px
- Afficher le récapitulatif du panier: ☒ Oui
- Afficher les détails de l'acheteur: ☒ Oui
- Afficher l'adresse de facturation: ☒ Oui
- Afficher l'adresse de livraison: ☒ Oui
- Afficher un titre personnalisé: ☒ Oui
- Titre personnalisé:
- Afficher un texte personnalisé: ☒ Oui
- Texte personnalisé:
- LOGs: ☐ Non

- Code ISO à ignorer:
Liste des codes ISO séparés par une virgule à ne pas envoyer aux passerelles de paiement Visa (Modifiez ce champ uniquement si vous avez créé des zones spécifiques pour vos transporteurs): (AD, AL, AT, BY, BE, BA, BG, HR, CY, CZ, DK, EE, FI, FR, GE, DE, GR, HU, IS, IE, IT, KZ, KW, LV, LI, LT, LU, MT, MS, MC, ME, NL, NO, PL, PT, RO, RU, RS, SK, SI, ES, SE, CH, TR, UA, GB, VN)

Enregistrer

The ISO codes to ignore represent the ISO country codes if you have modified the configuration of your countries for carriers.

For example, FR (France) is not to be sent because it's in Europe, while US (United States) is to be sent.

Creation of subscription product

In Prestashop > Catalog > Products, open the product to be sold as a subscription (or create a new one).

In the Modules tab > Axepta BNP Paribas, click on the "Configure" button

ID	Reference	Nouveau client	Livraison	Client	Total	Paiement	Etat	Date	Actions	
☐	Chercher un ID	Chercher une référence		Chercher un client	Chercher un total	Chercher un paiement	Paiement accepté	From To	Rechercher Réinitialiser	
☐	29	HCOUMWNR	Non	France	L gar	34,96 €	Aixpta BNP Paribas 2.0	Paiement accepté	31/10/2025 15:42:24	
☐	28	IQSTPDJl	Oui	France	R. Colas	69,25 €	Aixpta BNP Paribas 2.0	Paiement accepté	31/10/2025 15:37:24	
☐	23	ZSHORDAV	Non	France	S. HEST	22,94 €	Aixpta BNP Paribas 2.0	Paiement accepté	30/10/2025 16:40:42	

Please note that payments made in demo mode require being in Demo mode to be visible.

Manual Capture

Manually Capture Transaction

To manually capture a payment, you need to go to the list of transactions and click on the capture icon in the action column

Logs

Logs are always enabled. You can download them using the button at the top of the settings screen.

Refund/ Cancellation

To refund a transaction, you must first select the store where the order was placed (top right of the screen). A refund can only be processed for a single store at a time.

Next, go to the customer's order in the transaction details (as previously indicated) and click on "Partial Refund" in the "Order" tab to create a gift certificate :

Paiement accepté

Mettre à jour l'état

Imprimer la commande

Remboursement partiel

Produits (1)

Produit	Prix unitaire TTC	Quantité	Remboursé	Disponible	Total TTC	Facture
 T-shirt imprimé colibri (Taille : S - Couleur : Blanc) Numéro de référence : demo_1 Référence fournisseur : demo_1_46	22,94 €	1		264	22,94 €	#FA000350

You will be redirected to the "Product" tab of the same page. Follow these steps to process a partial refund:

1. Select the amount to refund (either total or partial). The amount cannot exceed the total order amount, and the quantity cannot exceed the originally purchased quantity.
2. Click on "Partial Refund":
3. After saving the amount, while still on the order details page, go back to the product details:
4. Select the transaction to be refunded
5. Choose a gift certificate option
6. Click "Refund"

- You can specify a partial amount if needed
- The product will now appear as "refunded" in the order details

Full Refund

Multiple partial refunds can be processed. However, the total of all partial refunds cannot exceed the original order amount.

Cancellation

If the transaction has not yet been processed by the bank (captured), cancellation is possible.

Transactions list

All transactions made with the Prestashop Axepta BNP Paribas 2.0 module are consolidated in a table displayed.

Transactions (1)											
ID de la transaction	Référence de commande	Identifiant de paiement	Montant	Devise	Type de MP	Créé à	Type de transaction	Code de réponse	Statut	Description	Actions
						From To					Rechercher
TRMMHVUEQEE_TioO	AVPPQGTAV	b4a71293bc4447dbb16 568259f9d5544	68.93	EUR	CARD	2025-10-28 14:17:06	SIMPLE_PAYMENT	00000000	OK	success	

Notice : The uninstallation and reinstallation of the module will result in the deletion of the transactions.

Subscription table

Transactions (1)											
ID de la transaction	Référence de commande	Identifiant de paiement	Montant	Devise	Type de MP	Créé à	Type de transaction	Code de réponse	Statut	Description	Actions
						From To					Rechercher
TRMMHVUEQEE_TioO	AVPPQGTAV	b4a71293bc4447dbb16 568259f9d5544	68.93	EUR	CARD	2025-10-28 14:17:06	SIMPLE_PAYMENT	00000000	OK	success	

In the Axepta BNP Paribas tab > Subscriptions: find the list of subscriptions:

5	Abonnement - produit virtuel	NCBISAQVF	DOE John	12,50 €	Statut	Tous les jours	2026-03-04 13:00:14	2026-03-04 11:00:19	Gérer
---	------------------------------	-----------	----------	---------	---------------------------------------	----------------	---------------------	---------------------	--------------------------------------

- Subscription ID
- The Subscription Product
- The order
- The customer
- The amount
- The status of the subscription
- Periodicity
- The start date
- The date of the next execution.

You have the option to change the status of the subscription to turn it on or off.

Stop a subscription

Action: *Stop a subscription*

Effect:

- The subscription goes to **stop** (there will no longer be automatic renewal).
- The customer **will no longer be charged** from that point forward.

Customer Account

Orders and subscriptions display an Axepta block in the customer area.

Installing a cron for prestashop

In order to automate the execution of certain tasks (such as triggering subscription payments), it is necessary to set up a scheduled task (cron) on your server.

Access the cron configuration

On a Linux server, open the terminal and run the following command:

```
crontab -e
```

Use this command to edit the current user's list of scheduled tasks.

Add the cron job

Add the following line to the file:

```
* * * * * php [PRESTASHOP_MODULE_PATH]/axepta2/run.php action=triggerSubscriptionPayment
```

- Replace [PRESTASHOP_MODULE_PATH] with the full path to your PrestaShop installation.
- This command executes the script to trigger subscription payments.

Define the periodicity

The five asterisks (* * * * *) define the frequency of execution:

* * * * * every minute

You can adjust this frequency as needed (e.g. hourly, daily, etc.).

To help you generate a suitable cron expression, you can use the following online tool <https://crontab.guru/>
