

Payment methods list

[Payment methods list](#) This page lists the payment methods available on AXEPTA Online and help you to identify those that correspond to your target market.

Understanding

- **Region / Country**
 - Geographical area in which the payment method can be subscribed by buyers.
 - This allows you to identify the payment methods of the target market (final customers in a given geographical area) in which the merchant want to develop activity.
 - Ex: Identify the usual payment methods used in Europe and available on AXEPTA.
- **Geographic area of interest**
 - Geographic area in which the payment method is considered standard.
 - If a merchant wants to develop the activity in a specific geographical area, he's advised to accept the payment method(s) whose main market (buyers) corresponds to his target.
 - Ex: A merchant who targets the French market is advised to accept CB.

Role-playing

Example: The merchant is based in Portugal. He wants to sell products online and targets Belgian customers

- Identify the payment methods that are most commonly used in Belgium, so that the target customers can pay for their purchases with their usual payment methods
- In the table, "Region of buyers" column lists the payment methods available in Europe and internationally
- Then the "Country of buyers" column allows you to identify the payment methods available in Belgium
- Finally, the column "Unmissable geographic area" indicates the payment methods available in Belgium
- In conclusion:
 - Belgium: Bancontact
 - International : Visa, Mastercard, Amex, Paypal, Apple Pay, Google Pay...
