# URLFailure

## URLFailure

| Key | Format | CND | Description |
|-----|--------|-----|-------------|
| URLF ailure | ans..256 | M | Complete URL which calls up  if payment has been unsuccessful. The URL may be called up only via port 443. This URL may not contain parameters: In order to exchange values between  and shop, please use the parameter UserData.<br><br>ⓘ **Common notes:**<br><br>• We recommend to use parameter "response=encrypted" to get an encrypted response by<br>• However, fraudster may just copy the encrypted DATA-element which are sent to URLFailure and send the DATA to URLSuccess /URLNotify. Therefore ensure to check the "code"-value which indicates success/failure of the action. Only a result of "code=00000000" should be considered successful. |

## URLFailure 3-D Secure

| Key | Format | CND | Description |
|-----|--------|-----|-------------|
