Description

The Settlement File aggregates all the data provided from the different payment methods used by the merchant in order to accommodate their reconciliation and reporting needs. Clearing and Settlement information are collected from the respective payment schemes, processors or acquirers.

The file is provided in a CSV format (comma separated file).

It is available :

- via the **AXEPTA BNP Paribas backoffice** (the file is available until **60 days** in the backoffice)
- via an **SFTP connection**
 - For configuration and account credentials please contact the [Axepta Helpdesk](#).
 - Merchants may collect BNP Settlement Files at their own discretion from a BNP SFTP account.
- via **email** (not recommended because the size is limited when there are large volumes of transactions)

Please note that the Settlement Files are generated in accordance with the frequency of clearing and settlement information made available by the relevant payment scheme(s), processor(s) or acquirer(s).

File is available everyday around 2:30pm.

sFTP informations

The files will be automatically deleted from the Axepta sFTP server after 14 days.

The reconciliation file is generated only when transactions are processed.

File structure

The file is provided in a CSV format (comma separated file).

Each Settlement File is structured into :

- a header record,
- one or multiple detail records
- and a total record.

The encoding for the line breaks is configurable at merchant level. Some fields may contain values of variable length. Where sizes are not given, a field size limitation does not apply.

Data format

Format	Description
a	Alphabetic characters A-Z, a-z
n	Numeric digits, 0-9
an	Alphanumeric characters A-Z, a-z, 0-9
ans	Alphanumeric and special characters
ns	Numeric and special characters
3	Fixed length data element of 3 characters
..17	Variable length data element up to a maximum of 3 characters. The minimum length is defined by the specific requirements of the data element itself, but shall be at least 1 character.
tstp	Timestamp, format: <DD.MM.YYYY hh:mm:ss>

Data element directory

All data elements of the BNP Settlement File are listed in alphabetical order in the table below. Some of the elements may contain sub-fields that provide data which are specific to an individual payment method, payment scheme or processor. For further details on these data please refer to the original documentation of the acquirer / processor.

Field name	Description
ACQUIRER_FEE	Charges for the services of Acquirer
AUTHORIZATION_AMOUNT	Authorized amount in smallest unit of transaction currency (e.g. EUR Cent)
CAPTURE_DATE	The date and time a transaction has been accepted by the acquirer / payment scheme for settlement, <DD.MM.YYYY hh:mm:ss>. If the time is not given it will be set to '00:00:00'.
COUNTER	Enumerator to ensure unique file names (left justified zero filled)
CUSTOMER_INFO	Constructed field encompassing specific customer related information depending on the payment method. Sub-fields are divided by '#' (U+0023) (Number Sign).
EXTENDED_INFO	Constructed field encompassing additional information that is available depending on the payment method. Sub-fields are divided by '#' (U+0023) (Number Sign).
FILE_CREATION_DATE	Date the BNP Settlement File was created, <DDMMYYYY>
INTERCHANGE_FEE	Fees charged by the card issuer

MERCHANT_ID	BNP merchant identification
ORDER_DESCRIPTION	A description of the order the payment relates to
PAYMENT_CREATION_DATE	Date and time the payment has been created, <DD.MM.YYYY hh:mm:ss>
PAYOUT_DATE	Payout date by Payment Institution
PAYOUT_ID	Reference number of payout generated by Payment Institution
PROCESSING_FEE	Charges for the services of Processors (PSP, Gateway, Network Operator)
RECORD_COUNT	Total number of rows in detailed records section
RECORD_TYPE	<p><u>Header record</u></p> <p>Identifies the respective entry as header record, value '100'.</p> <p><u>Detail record</u></p> <p>Identifier that specifies the payment method and type of account ledger entry (e.g. debit and credit). Charges to customers are indicated as debits and payments to customers as credits.</p> <p><u>Totals record</u></p> <p>Identifies the respective entry as totals record, value '900'.</p>
REFERENCE_NUMBER	The Reference Number is a unique string submitted by the merchant in order to identify a payment (e.g. invoice number, ticket number etc.). It usually gets forwarded to the payment scheme and is echoed in the clearing records / reports so that it can be matched with submitted transactions.
SCHEME_FEE	Fee charged by the card organization
STATUS	The status of the payment, currently always 'OK'
TOTAL_AMOUNT	Sum of all transaction amounts (credits are also summed up to the total amount) in the detailed record section in the smallest unit of transaction currency (e.g. EUR Cent)
TRANSACTION_AMOUNT	The amount that has been processed by the payment scheme in smallest unit of the transaction currency (e.g. EUR Cent)
TRANSACTION_CURRENCY	Refers to the three-letter ISO 4217 currency code of the currency in which the transaction was processed
TRANSACTION_ID	Unique reference submitted by the merchant in order to recognize a payment for an order. It might be shared across a sequence of related transactions (requests) that constitute a payment (e.g. authorization, capture, credit, etc).

PAYOUT elements are available for:

- Amex (EPA)
- PPRO

File name (.ctsf)

Naming convention: <MERCHANT_ID>#<FILE_CREATION_DATE>#<COUNTER>.ctsf

No.	Element	Format	Example
-----	---------	--------	---------

1	MERCHANT_ID	an..20	ACME01
2	FILE_CREATION_DATE	N8	20201014
3	COUNTER	N3	001

File name example: ACME01#20201014#001.ctsf

Settlement file's table (version 1.5)

Header record

No	Field name	Format	Description	Example
1	RECORD_TYPE	N3	<u>Header record</u> : Identifies the respective entry as header record, value '100'.	100
2	MERCHANT_ID	An..30	Merchant's identification (MID) provided by Axepta BNP Paribas during the onboarding phase	BNP_MERCHANT_ECOM_FR_EUR
3	DATE	N8	Date the Settlement File was created, <DDMMYYYY>.	20200424
4	VERSION	An..4	Version (current version is 1.5)	1.5

Detail record

Fields 41 to 50 will stay empty until future enhancements.

- For 1 succesful transaction there will be a line on the settlment file with 50 columns
- Empty fields must be ignored

No	Element	Format	Description	Example
1	RECORD_TYPE	N3	<u>Detail record</u> : Identifier that specifies the payment method and type of account ledger entry (e.g. debit and credit). Charges to customers are indicated as debits and payments to customers as credits. Link to the "RECORD TYPE" table: RECORD TYPE TABLE	510
2	SALE_CHANNEL	An..32	Channel of the payment ECOM, MOTO, POS	
3	MERCHANT_ID	An..30	Merchant's identification (MID) provided by AXEPTA BNP Paribas during onboarding phase (1MID =1 shop)	BNP_MERCHANT_ECOM_FR_EUR
4	ACQUIRING_CONTRACT_ID	An..50	Contract ID provided by the processor or acquirer (BNP Paribas, PPRO, AMEX, PayPal, etc)	4970600 (pour BNP Paribas) EXAMPLELIVE CONTRACT (pour PPRO)
5	BUSINESS_REGISTRATION_NUMBER	An..50	Registration number of the company (Siret number in France)	34979735700010
6	STORE ID	Ans..120	Data only available for POS transaction indicates the merchant's store where the purchase was made	BOUTIQUE PARIS15 CONVENTION
7	TERMINAL ID	Ans..32	Data only available for POS transaction indicates the terminal ID (POS terminal) used for the transaction	0431775016
8	MERCHANT_ACCOUNT_NUMBER	An..34	Merchant account number available in BNPP reconciliation file - only for card payments	
9	PAY_TYPE	An..32	Payment method or POS for POS transactions	Card / Paypal / POS
10	PAYMENT_CREATION_DATE	Tstp	Date and time the payment has been created, <DD.MM.YYYY hh:mm:ss>.	20.04.2020 14:18:23
11	PAYMENT STATUS	A2	The payment status is always 'OK' because this file is only taking into account successful and settled transactions	OK

12	ARCHIVE REFERENCE NUMBER	An..12	Reference Number submitted by the merchant to identify a payment (e.g. invoice number, ticket number etc.). It usually gets forwarded to the payment scheme and is echoed in the clearing records / reports so that it can be matched with submitted transactions.	00200Y2049Z8
13	TRANSACTION _ID	Ans..64	Unique transaction reference submitted by the merchant to recognize a payment for an order. It might be shared across a sequence of related transactions (requests) that constitute a payment (e.g. authorization, capture, credit, etc).	890_XUoqyBW uGw
14	AUTHORIZATI ON_AMOUNT	N..12	Authorized amount in smallest unit of transaction currency.	789
15	AUTHORISATI ON_NUMBER	N..6	Authorization number - only for card payments (ecom & POS transactions)	
16	TRANSACTION _AMOUNT	N..12	The amount that has been processed by the payment scheme in smallest unit of the transaction currency.	700
17	TRANSACTION _CURRENCY	A3	Refers to the three-letter ISO 4217 currency code of the currency in which the transaction was processed.	EUR
18	CUSTOMER_I NFO	Ans..160	Constructed field encompassing specific customer related information depending on the payment method. Sub-fields are divided by '#' (U+0023) (Number Sign). Details CUSTOMER INFO	4111xxxxxxx9 996#VISA
19	CARD_SCHEME	An..30	Scheme CB, VISA, MASTERCARD	CB
20	CARD_TYPE	A1	Available for cards (BNPP acquiring) and POS transactions Card type : C for Credit card D for Debit card P for Prepaid card U for Universal card b Unknown (Blank)	
21	CARD_NATURE	A1	Available for cards (BNPP acquiring) and POS transactions Card Nature P Consumer Card E Commercial Card b Unknown (Blank)	
22	ISSUING_BAN K_BIN	N..6	Available for cards (BNPP acquiring) and POS transactions Issuing Bank BIN	
23	ISSUING_BAN K_ID	N..5	Available for cards (BNPP acquiring) and POS transactions Issuing bank Identifier	
24	TX_REGION	N..3	Available for cards (BNPP acquiring) and POS transactions Transaction Regionality	
25	CH_COUNTRY _CODE	N..3	Available for cards (BNPP acquiring) and POS transactions Cardholder country code	
26	ORDER_DESC RIPTION	Ans..768	A description of the order the payment relates to.	Monthly subscription fee to ACME TV
27	EXTENDED_IN FO	Ans..200	Constructed field encompassing additional information that is available depending on the payment method. Sub-fields are divided by '#' (U+0023) (Number Sign).	Details Extended info
28	CAPTURE_DA TE	Tstp	The date and time a transaction has been accepted by the acquirer / payment scheme for settlement, <DD.MM.YYYY hh:mm:ss>. If the time is not given it will be set to '00:00:00'	24.04.2020 00: 00:00
29	PAYOUT_ID	Ans..32	Settlement file ID (Invoice number for PPRO transactions)	869843
30	PAYOUT_DATE	N8	Payout date	20200528
31	PAYOUT_REF ERENCE	Ans..32	Settlement file reference number	0000341501170
32	PAYOUT_CUR RENCY	A3	Currency of account	EUR

33	INTERCHANG E_FEE*	Ans..20	Fees charged by the card issuer.	1.875
34	SCHEME_FEE*	Ans..20	Charged by the card schemes for using their network	1.875
35	ACQUIRER_FE E*	Ans..20	Charges for the services of Acquirer.	1.875
36	PROCESSING_ FEE	Ans..20	Charges for the services of Processors (PSP, Gateway, Network Operator).	1.875
37	CHARGEBACK FILE NUMBER**	Ans..20	Chargeback case number will allow the merchant to follow the chargeback file (exchanging with the schemes)	110034150116
38	CHARGEBACK CODE AND REASON**	Ans..400	Chargeback code (provided by the scheme) # Chargeback reason (text)	1261#duplicate processing
39	CHARGEBACK AMOUNT**	N..12	Chargeback amount	600
40	CHARGEBACK DATE**	N8	Chargeback date	20200421
41	PAYID	an..32	Payment ID generated by Axxenta

Data integration of external payment providers

When you activate the AXEPTA Settlement file service, the payment methods CB/VISA/MASTERCARD will be automatically included.

However, for any additional payment method, we invite you to contact our technical Support (bnpparibas@computop.com) to receive the required instructions for the data activation of these other payment methods.

Below are the instructions of the main alternative payment methods :

PayPal

In order for us to get the settlement and clearing files of PayPal, you need to provide us with your PayPal SFTP account information.

To do so, you need to :

1. Contact your PayPal « Account Manager » to activate the SFTP functionality in your PayPal customer account. Once it is activated, you will be able to directly access it via your PayPal account .
2. Then, from your PayPal account, create a secure SFTP account in the section "account information - Creating a secure FTP server user ».
3. Once the SFTP is successfully created, please send to us (bnpparibas@computop.com) your SFTP data access : login + password.

Please find the PayPal documentation that may help you : <https://developer.paypal.com/docs/reports/sftp-reports/settlement-report/#know-before-you-begin>

Note :

1. We will never ask for your PayPal account password (this data is confidential), we only need your PayPal SFTP account data information.
2. Do not mix up the activation of PayPal as a payment method in AXEPTA (activation done during your subscription) with the integration of PayPal reporting files in Axepta (process just described above).

AMEX

For AMEX you will need to provide your AMEX contract number and fill in the "AMEX EPA Application form" which allows us to retrieve the AMEX reporting files. The form will be provided by BNP Paribas support (bnpparibas@computop.com) that you will need to contact directly.

Trustly

No action required for the merchant
